

# Brandon Black – Full Stack Web Developer

Seattle, Washington | (253) 444-8733 | [brandonblack02@gmail.com](mailto:brandonblack02@gmail.com)

[linkedin.com/in/brandonblack02/](https://www.linkedin.com/in/brandonblack02/) | [github.com/Brandon205/](https://github.com/Brandon205/) | [brandonblack.dev](https://brandonblack.dev)

## SKILLS //

**Frontend** - JavaScript, React, React Native, TypeScript (Basic), Apollo, Sass, HTML5, CSS3

**Backend** - Node.js, Java (Basic), C# (basic), Python, GraphQL, MongoDB, Mongoose, SQL, VBA

## RELATED PROJECTS //

**PotterGo** - <https://github.com/Brandon205/PotterGo> November 2019

- A one day hackathon project that was made by me and one other developer, along with 3 UX Designers.
- A demo MERN app that uses Mapbox and a Harry Potter API to supply information from the series.
- Our project placed first in the Hackathon because of the planning by the UX designers, along with the amount of functionality that my teammate and I were able to add in.

**ACNH Prices** - <https://brandon205.github.io/acnh-prices/> June 2020

- Small and fast front end only side project that will display information on in game items from a hand-made JSON file
- Uses mostly React for its speed and simplicity to create a nice and easy to use UI.

**PrimeBid Excel** - <http://brandonblack.dev/bidding-software> April 2021

- A construction bidding software program that uses Excel as a foundation and custom VBA code for the data analysis and sorting functions. Based on a now deprecated program called PrimeBid.
- By using Visual Basic for Applications this workbook can analyze and find the combinations of bids that are the most cost effective while still meeting the needs of the section codes.
- Worked with Jody Miller Construction who explained the features needed and how they are supposed to function.

**Hue Lite** - <https://brandon205.github.io/hue-lights/> June 2021

- A web based app used for basic control over any Hue light on your network.
- Used Axios to access and send information to the Hue API.
- For the Front end React and Materialize for the User Interface of the website.

## EDUCATION //

**General Assembly Software Engineering Immersive** September 2019-December 2019  
Seattle, WA

Full-stack web development graduate in an intensive, twelve-week, 450+ hour program.

**Pierce College** September 2017-June 2019  
Puyallup, WA

Associate of Arts (AA) Degree.

## WORK EXPERIENCE //

**Best Buy – Product Flow Specialist** October 2020-Current

Worked in a fast-paced team environment to receive and ship product in/out of the store, ensuring product integrity and customer fulfillment.
