SKILLS //

Frontend - JavaScript, React, React Native, Basic TypeScript, HTML5, CSS3

Backend - Node.js, Python, SQL, MongoDB, GraphQL, Basic Java, Basic C#, VBA

PROJECTS //

PrimeBid Excel - <http://brandonblack.dev/bidding-software>

April 2021

- A construction bidding program that uses Excel as a foundation and custom VBA code for the data analysis and sorting functions. Based on a now unmaintained program called PrimeBid.
- By using Visual Basic for Applications (VBA) this workbook can analyze and find the combinations of bids that are the most cost effective while still meeting the needs of the various section codes.

Guitario - <https://github.com/Brandon205/guitario>

February 2022

- Small and quick app that works on Android, IOS, and the Web. Built mostly with React Native, it is designed to help users learn the fretboard of a guitar.
- Uses the Web Audio API to listen and analyze user audio that can check if they are playing the right note, and it will also display the current note the user is playing.

Doto - <https://github.com/Brandon205/doto>

January 2022

- A todo list app that uses React Native and Async Storage to store different tasks a user inputs.
- Has a simple interface allowing users to add their tasks into 3 categories - Soon, Later, and Eventually.

PotterGo - <https://github.com/Brandon205/PotterGo>

November 2019

- Achieved a first place prize in a 2-day group hackathon, built by 1 other developer, 3 UX Designers, and I. Using Mapbox and a Harry Potter API to supply information, I led the efforts on getting Mapbox into React and helped out where I could on implementing the UX features into the app.

WORK EXPERIENCE //

Best Buy — *Product Flow / Keyholder / SWAT Backup* — **October 2020 - Current**

Leads a fast-paced team environment, as well as expanded responsibilities to include opening and closing the store as well as doing weekly counts to ensure our inventory amounts are accurate all in less than one year.
