SKILLS //

Frontend - JavaScript, React(with hooks), Typescript, Apollo, HTML, CSS, Materialize

Backend - Node.js, Express, Python, GraphQL, MongoDB, Mongoose, SQL, Sequelize, SQLAlchemy

RELATED PROJECTS //

cubeX - https://sheltered-reef-38980.herokuapp.com/   December 2019

A MERN app that uses GraphQL and Apollo for all of the database calls and manipulations along with React with hooks for the front end. It is a simple app that will allow users to time themselves while solving a Rubik's cube, it also has many data-analysis features like averages and a graph, for the user to track their times in more visual ways.

PotterGo - https://github.com/Brandon205/PotterGo   November 2019

A 1 day hackathon project that was made by me and one other developer, along with a group of 3 UX Designers. It is a simplistic MERN app that uses MapBox to place images at certain locations that the user would have to go to. It also reaches out to an external Harry Potter api to get information, like wands, from the Harry Potter series. Our project placed 1st in the hackathon.

Adventure Awaits - https://boiling-depths-32027.herokuapp.com/   November 2019

A MongoDB, Express, React, Node.js (MERN) app, that was created by a team of developers. Using React for the front end made the website very quick and responsive, while on the backend Node, Express, and MongoDB handle a JWT authentication system along with that will allow for users to have their own secure accounts.

TrailWeather - https://fast-coast-44019.herokuapp.com/   October 2019

A full stack web app that is used to help plan your hikes more accordingly with the weather. This app uses HTML, a templating language called EJS, CSS, and Javascript to lay out the foundation along with a database and 3 APIs including Mapbox and the DarkSky API to provide information to the user about any weather or hike information they need.

WORK EXPERIENCE //

Costco Wholesale – Service Deli Assistant   October 2018-August 2019

Worked in a fast-paced team environment to create hundreds of products for sale each day. Was able to quickly climb up to be one of the hardest working, and most efficient employees. Documented success in the position and expanded my duties to include managing, training, and onboarding of a new employee.

EDUCATION //

General Assembly Software Engineering Immersive -   September 2019-December 2019
Seattle, WA

Full-stack web development graduate in an intensive, twelve-week, 450+ hour program.

Pierce College -   September 2017-June 2019
Puyallup, WA

Associate of Arts (AA) Degree.
